

ECOSOFT ROBUST 3000

WATERCARE

The Ecosoft robust 3000 for exceptional water...

- Exceptional water quality
- For drinking water, cooking and ice makers
- Cost-effective water treatment
- 3-Stage filtration process

A compact high-capacity reverse osmosis unit for use in a professional kitchen. It produces clean and safe water for drinking, cooking and water for ice makers.

Reverse Osmosis Units are particularly cost-effective for caterers with extremely hard or variable water quality, who need volumes of treated water. RO offers a viable alternative to filters, calcium treatment units and demineralisation systems.

Output: 145-150 litres per hour.

**REVERSE OSMOSIS FOR
EXCEPTIONAL WATER**

ECOSOFT ROBUST 3000 | Reverse Osmosis for exceptional water

Multi-stage filtration system for exceptional water quality and protection.
