## WATERCARE

### ROBUSTPRO, exceptional water for coffee

A compact high-capacity reverse osmosis unit for use in preparing barista coffee and other hot beverages. Its multi-stage filtration system purifies water and enriches it with minerals essential for perfect coffee taste and aroma.

Reverse Osmosis Units are particularly cost-effective for baristas with extremely hard or variable water quality, who need volumes of treated water. RO offers a viable alternative to filters, calcium treatment units and demineralisation systems.

Output: 70-75 litres per hour.

#### APPLICATIONS

Commercial coffee machines.

With the ROBUSTPRO, you can experience the particular flavour of your coffee, thanks to optimal water salinity:

- **Calcium** will fill the body of the drink
- **Magnesium** helps extract fruit acids
- **Bicarbonates** provide a balance of taste and aroma

#### Features & Benefits

- Protects coffee equipment from limescale meaning, prolonged machine life and reduced breakdown & repair costs
- Engineered for the perfect coffee in cafés and restaurants
- Exceptional water quality for coffee (in accordance with SCA standards)
- Balanced mineral composition of water
- Built-on pressure gauges indicating pre-filters and membrane conditions
- 4 Stage filtration process
- Consistent high capacity in a compact and attractive design
- Available in white or brown

**REVERSE OSMOSIS WATER  
FOR PERFECT COFFEE**

**CONTINUED OVERLEAF**

# ROBUSTPRO

## 4 Stage Filtration Process

**Stage 1:** Pre-filtration removed sediment impurities, and organic compounds.

**Stage 2:** Reverse Osmosis membrane eliminated 99.8% of dissolved impurities, viruses, and bacteria.

**Stage 3:** Allows water with a small content of magnesium and calcium back, to enhance coffee flavour and aroma.

**Stage 4:** Post-filtration by activated carbon improves the taste and odour of water.

Reverse osmosis is the most reliable water treatment technology. Due to the special semi-permeable membrane, sufficient drinking water can be purified of all kinds of harmful impurities, including viruses and bacteria. RO membrane pores are 200 times smaller than viruses, and 4000 times smaller than bacteria.

## Part Descriptions & Codes

Description	Dimensions H x W x D (mm)	Flow Capacity (Litres per hour)	Water Consumption (Litres per hour)	Part No.
ROBUST PRO REVERSE OSMOSIS UNIT (BROWN) WITH UK PLUG	420 x 425 x 265	70 - 75	110 - 120	ROBUSTPROBUK
ROBUST PRO REVERSE OSMOSIS UNIT (WHITE) WITH UK PLUG	420 x 425 x 265	70 - 75	110 - 120	ROBUSTPROWUK

Installation pack includes: ROBUSTPRO Reverse Osmosis Filter, Drinking water faucet, Connection fittings pack, Service wrenches and User manual

## Replacement Filters and Components

Description	Part No.
ROBUST PRO SET OF REPLACEMENT FILTERS 1-2-3	ROBUSTPRO-CARTKIT
ROBUSTPRO DOW-TW30-3012-500 GDP MEMBRANE ELEMENT	ROBUSTPRO-MEMBRANE-KIT
