

100%
RECYCLABLE

CTU Demin, for streak free glassware

Our new range of DEMIN Calcium Treatment Units are specially formulated for use with commercial glasswashers and dishwashers. Our de-mineralisation units remove up to 95% of total dissolved solids from the incoming water supply. This produces a high quality water that leaves glasses clean and sparkling straight from the dishwasher or glasswasher. Single units are normally dedicated to individual appliances. Where larger capacities of treated, demineralised water are required we would recommend duplex or triplex systems.

Available in 10, 18, 23 and 30 litre capacities.

Features & Benefits

- Removes up to 95% of total dissolved solids
- Leaves glasses sparkling clean and streak-free
- Own brand options available

Description	Dimensions (mm)		Capacity (Litres)	New Unit Code	Regen Unit Code
