

D demin

FOR SPARKLING RESULTS

For streak free glassware

Our range of DEMIN Calcium Treatment Units are specially formulated for use with commercial glasswashers and dishwashers.

Our de-mineralisation units remove up to 95% of total dissolved solids from the incoming water supply. This produces a high quality water that leaves glasses clean and sparkling straight from the dishwasher or glasswasher.

Single units are normally dedicated to individual appliances. Where larger capacities of treated, demineralised water are required we would recommend duplex or triplex systems.

Available in 10, 16, 23 and 30 litre capacities.

enviromental credentials

Zero single-use plastics

Resin 100% regenerated and returned to use

Reduces energy usage via limescale reduction

Vessel part recyclable at end of life

| Model | HxDmm | Capacity ltrs | New Unit Code |
|---|---------|---------------|---------------|
| Demineralisation treatment unit, 10 litre for glasswasher | 511x200 | 900 | DM10 |
| Demineralisation treatment unit, 16 litre for glasswasher | 505x263 | 1410 | DM16 |
| Demineralisation treatment unit, 23 litre for glasswasher | 670x263 | 2125 | DM23 |
| Demineralisation treatment unit, 30 litre for glasswasher | 970x263 | 3340 | DM30 |

Capacity based on water hardness of 300ppm TDS

choice of resins

The units are available with different quality resins to meet specific requirements of the appliance. For example MB59 resin is suitable for use with glasswashers and combination ovens.

These units will not only protect the equipment from scale but will reduce possible chloride attack and leave glasses spot free.

high purity option

Demin units can be manufactured using MB 400 resin which are designed for specific applications requiring very high purity water.

For example, in laboratory or scientific use, final rinse, double glazed units or battery top up water.

reduce single-use plastic waste

The perfect alternative to single-use plastic water filters, the CTU can be regenerated, recycled and returned to market making it a genuinely green filter providing not only streak free glassware, but protecting the environment and keeping our oceans and landfill free from plastic.

Features & Benefits

- Removes up to 95% of total dissolved solids
- Leaves glasses sparkling clean and streak-free
- Own brand options available
